SECTION B FLOOD INSURANCE RATE MAP (FIRM)	INFORMATION		
Provide the following from the proper FIRM (See Instructions):			
1. COMMUNITY NUMBER 2. PANEL NUMBER 3. SUFFIX 4. DATE OF FIRM INDEX	5. FIRM ZONE	6. BASE FLOOD FLEVATION	
410692 0001 C 1-19-82	A	6. BASE FLOOD ELEVATION (in AO Zones, use depth). 12868	
7. Indicate the elevation datum system used on the FIRM for Base Flood Elevations (BFE 8. For Zones A or V, where no BFE is provided on the FIRM, and the community has estathe community's BFE: 1286 18 feet NGVD (or other FIRM datum—see Section		Other (describe on back this building site, indicate	
SECTION C BUILDING ELEVATION INFORM			
of 1/287.8 feet NGVD (or other FIRM datum—see Section B, Item 7). (b). FIRM Zones V1-V30, VE, and V (with BFE). The bottom of the lowest horizontal struthe selected diagram, is at an elevation of 1 feet NGVD (or other FIRM (c). FIRM Zone A (without BFE). The floor used as the reference level from the selected below (check one) the highest grade adjacent to the building. (d). FIRM Zone AO. The floor used as the reference level from the selected diagram is one) the highest grade adjacent to the building. If no flood depth number is available level) elevated in accordance with the community's floodplain management ordinance. Indicate the elevation datum system used in determining the above reference level elevation Comments on Page 2). (NOTE: If the elevation datum used in measuring the election to the datum system used equation under Comments on Page 2.)	datum-see Sect diagram is feet above, is the building's left ations: NGVD ations: NGVD are don the FIRM and	tion B, Item 7). Lifeet above or or or below (check owest floor (reference of Unknown) '29 Other (describe of than that used on of d show the conversion)	
Elevation reference mark used appears on FIRM: Yes No (See Instructions on	Page 4) RM 3	3	
The reference level elevation is based on: Actual construction construction draw (NOTE: Use of construction drawings is only valid if the building does not yet have the recase this certificate will only be valid for the building during the course of construction. A will be required once construction is complete.)	vings eference level floc post-construction	or in place, in which Elevation Certificate	
The elevation of the lowest grade immediately adjacent to the building is: 11266 8	eet NGVD (or	other FIRM datum-see	
SECTION D COMMUNITY INFORMATION			
If the community official responsible for verifying building elevations specifies that the reference of the "lowest floor" as defined in the community's floodplain management ordinance, loor" as defined by the ordinance is:	the elevation of th		

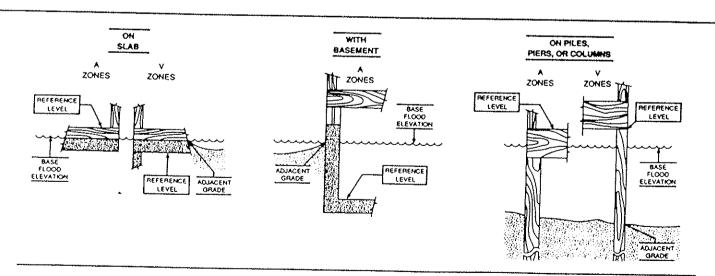

SECTION E CERTIFICATION

This certification is to be signed by a land surveyor, engineer, or architect who is authorized by state or local law to certify elevation information when the elevation information for Zones A1–A30, AE, AH, A (with BFE),V1–V30,VE, and V (with BFE) is required. Community officials who are authorized by local law or ordinance to provide floodplain management information, may also sign the certification. In the case of Zones AO and A (without a FEMA or community issued BFE), a building official, a property owner, or an owner's representative may also sign the certification.

Reference level diagrams 6, 7 and 8 - Distinguishing Features—If the certifier is unable to certify to breakaway/non-breakaway wall, enclosure size, location of servicing equipment, area use, wall openings, or unfinished area Feature(s), then [5] The Feature(s) not included in the certification under Comments below. The diagram number, Section C, Item 1, must still be refered by the control of the certification under Comments below.

I certify that the information in Sections B and C on this certificate represents my best efforts to interpret the tight evaluable YOR I understand that any false statement may be punishable by fine or imprisonment under 18 U.S. Code, Section 1001.

Copies should be made of this Certificat	e for: 1) community	official, 2) insurance agent/co	mpany, and 3) build	ling owner.
COMMENTS:				

The diagrams above illustrate the points at which the elevations should be measured in A Zones and V Zones.

Elevations for all A Zones should be measured at the top of the reference level floor.

Elevations for all V Zones should be measured at the bottom of the lowest horizontal structural member.
